SUMMARY

AWS Certified Solutions Architect Associate and Cloud DevOps Engineer with a proven track record of designing and delivering resilient, scalable CI/CD solutions. Expert in automating deployments and provisioning via Infrastructure-as-Code (IaC) on AWS to reduce manual overhead and improve deployment velocity. Proficient in architecting secure, high-performance environments and robust monitoring systems for production-ready software. Experienced in containerization and service orchestration, consistently focused on clean architecture and efficient problem-solving to drive measurable technical impact across complex cloud infrastructures.

SKILLS

Containers & Orchestration: Kubernetes, Docker, Docker Compose, Linux, Bash
CI/CD: Jenkins, GitHub Actions, AWS CodePipeline
IaC Tools: Terraform, AWS CloudFormation
Monitoring: Prometheus, Grafana, CloudWatch, SNS
Cloud Services: AWS (EC2, ECS S3, IAM, VPC, RDS, Systems Manager, DynamoDB), Azure DevOps
Version Control: Git, GitHub, GitLab

EDUCATION

9/2022 **Pakistan Institute of Engineering & Applied Sciences - Islamabad, Pakistan**
Bachelors in Computer & Information Sciences

EXPERIENCE

- 10/2025 – Present **Cloud DevOps Engineer – AliCloudNexus SMC** **Remote, USA**
- Migrated existing CI/CD pipelines from Jenkins to GitHub Actions, ensuring secure integration with AWS using encrypted secrets.
 - Automated scheduled database backups using cron-based workflows and stored them in Amazon S3 for reliable data retention.
 - Monitored and optimized CI/CD workflows, managing IAM permissions and collaborating with the platform team to maintain stable AWS infrastructure.
GitHub Actions, Jenkins, Tugboat, CI/CD, DataDog / AWS (EC2, S3, IAM, SSM, RDS, VPC)
- 02/2026 – Present **SRE/DevOps Engineer – Xgrid.Co** **Islamabad, Pakistan**
- Architected high-availability WordPress infrastructure on AWS using Terraform, deploying ECS clusters, RDS instances, and ALBs with automated IAM least-privilege security.
 - Engineered a CloudWatch observability suite by defining SLOs for p95 latency and error rates, visualized through real-time dashboards and SNS-integrated composite alarms.
 - Automated containerized deployment pipelines with Jenkins and Docker, implementing system-audit Bash scripts and JSON/jq parsing for infrastructure health reporting.
AWS (ECS, RDS, EC2, ALB, SNS, SSM), Terraform, Docker, Jenkins, CloudWatch (SLOs/SLIs)

PROJECTS

- MERN, AWS **StreamFlix – Movie App** **GitHub**
Developed a MERN movie App with JWT authentication, Docker containerization for AWS deployment, and OMDb API integration for movie browse and favorites management
- Jenkins, GHA **Jenkins to GitHub Actions Migration**
Migrated CMS production database backup from Jenkins to GitHub Actions in GovCloud, using Docker container for cli dependencies and SSM Parameter Store for secrets on self-hosted runners.
- AWS, Jenkins **AWS Secure Configuration & CI/CD Automation**
Managed sensitive data in AWS Systems Manager Parameter Store using SecureStrings encrypted with KMS, and automated deployments with Jenkins on self-hosted EC2 runners.

CERTIFICATIONS

- AWS Certified Solutions Architect Associate** **Certificate**
Coursera
- DevOps on AWS** **Certificate**
AWS
